# The EASiHE Project: eAssessment in Higher Education

David Bacigalupo[1], Gary Wills[2], Lester Gilbert[2], Bill Warburton[1], Pei Zhang[2], Bart Nagel[2], Sue Walters[2]
[1]iSolutions, [2]School of Electronics and Computer Science
University of Southampton SO17 1BJ

The EASiHE project is developing a solution for formative e-Assessment, by integrating services currently available within the JISC eFramework. Examples of these services include QTI Engine, Peer Pigeon, LexDis, QTI Migration Tool and Edshare. A joint School of Electronics and Computer Science and iSolutions (University IS department) project, we are working closely with six schools across the University. In addition, we are running a benefits realisation sub-project to extend our work to Bournemouth and Poole College. Work so far has received very positive feedback from initial lecturer and student evaluations, University senior management via our advisory panel, and from the wider community as we disseminate our results. Our aim is to ensure that these results are of both immediate and long-term benefit to the University of Southampton, as well as the national and international HE community.
